

SHELTER HEATERS

Manufactured by Air Shelters USA, LLC

PROPANE FIRED SHELTER HEATER PART # 9906

includes Heater, Blower, Duct and Remote Thermostat

Propane Tent Heater when coupled with the required blower provides fresh warm air for all your confined space needs. This unit is propane fired and electrically powered. Requires the model 1325D Ventilator to operate. Ships with remote thermostat, and ducting.

TRI-FUEL SHELTER HEATER PART # 9935

includes Heater, Duct , Remote Thermostat on wheels

Tri-Fuel Tent Heater , indirect heat, provides fresh warm air for all your confined space needs.

This unit utilizes Diesel, Kerosene or Jet Fuels.

A heat exchanger keeps exhaust gas and heated air separate and large capacity fuel tank provides hours of continuous operation.

Includes:

- Flexible Heat Duct and Duct Adaptor
- Remote Thermostat
