STAGE-ONE Decon

The new Stage-One Decon Shelter from ZUMRO SHELTERS is a rapid deployed pre-plumbed single user Shower Unit specifically designed for Gross Decon.

While designed as a “stand alone” unit, this Shelter has a unique “Link-Up” feature. Both the Canopy and the Containment Pool can be connected to form a multi-stage shower system if so desired. The Stage-One Decon unit can also be linked to any size ZUMRO Shelter (*Shelter must have “Connector Door” feature installed*) with the optional Connector Transfer Panel. This enables full inter-operability with existing ZUMRO SHELTER Systems.

The Inner Replaceable Canopy is pre-assembled to a “ZUMRO Quality” Inflatable Frame, strong enough to withstand high winds and designed to last for decades.

The Integral Containment Pool and Base utilizes ZUMRO SHELTERS’s patented Roll-Up Elevated Shower Plat-form. The Roll-Up Grid is Velcro secured to the Pool and removable to be stored separately.

Color coded dual-line Shower Hoses with multiple outputs and Drain Hose are pre-plumbed in the unit.

Additional Connections can be used for the optional the Surround Shower Hose. Velcro attachment points are provided in the Canopy to secure the Shower Hose (*as shown on front page*). The Shower Hose has quick Connect Couplings at each bottom end for additional hose connections if so desired. The Surround Shower Hose is equipped standard with four 1.2 GPM Nozzles. Other flow rates are available upon request.

STANDARD FEATURE

STAGE-ONE Decon Shelters can be linked (on either side) to expand Decon capabilities.
